VOLUME IX

MAY 23, 1992

NO. 10

REGISTER OF DOCUMENTS PREPARED UNDER CHAPTER 343, HAWAII REVISED STATUTES

The *OEQC Bulletin* is a semi-monthly publication. The publication dates of the bulletin are the eighth and twenty-third of each month. Applicants should deliver an appropriate number of Draft and Final Environmental Impact Statements (EIS) to the accepting authority before distributing copies and submitting copies to OEQC for publication. Environmental Assessments should be submitted to the appropriate agency directly. Based on the assessment, the appropriate agency will submit to OEQC a determination of a Negative Declaration or a Preparation Notice for publication in the bulletin. Draft and Final EISs must be received by the fifth and twentieth days of the month for publication in the respective issue. Negative Declarations and Preparation Notices must be received at least five working days prior to the publication date. All documents submitted for publication in the *OEQC Bulletin* should be delivered to the Office of Environmental Quality Control, 220 South King Street, 4th Floor, Honolulu, Hawaii 96813. To ensure proper processing of documents, please attach *OEQC Bulletin Publication Form (Form 91-1)* with all submittals. These forms can be obtained by calling OEQC at 586-4185.

NOTICE

Since the deadline for Draft and Final EIS is so close to the publication date for the OEQC Bulletin, please assist us by bringing the Document for Publication Form #91-1 and a computer disk with the project description (size 3 1/2" or 5 1/2" disk are acceptable; preferably WordPerfect 5.1) to the Office of Environmental Quality Control as early as possible. Thank you.

NEGATIVE DECLARATIONS

The following actions have been determined to have little or no impact upon the environment by the listed agency. As a consequence, Environmental Impact Statements are not required of these projects. Those who wish to contest the agency's determination have a 60-day period, from this publication date, in which to initiate litigation. Any questions regarding the following project(s) should be directed to the listed contacts.

HAWAII

KEAHOLE TELECOMMUNICATION TOWER

District: North Kona
TMK: 7-3-49: 36
Agency: Department of Land and Natural Resources
Contact: Edward Henry (587-0380)
Applicant: Hawaiian Electric Light Company
Contact: Michael Bradley (935-1171)

The applicant proposes to construct a 50 foot galvanized steel three legged self supporting microwave tower. The tower will have one 12 foot solid microwave antenna mounted at 45 feet. The tower and antenna will be painted a light gray in color.

The tower will provide the means for allowing required communications for protection of transmission lines, supervisory control of the site, data acquisition, and voice.

STATE TREE NURSERY OPERATIONS BUILDING

District: South Kohala
TMK: 6-6-05:01
Agency: Department of Land and Natural Resources, Division of Forestry and Wildlife
Contact: Charles Wakida (933-4221)

The Division of Forestry and Wildlife (DOFAW) plans to construct a replacement Nursery Operations Building containing 4,200 square feet at the State Tree Nursery, Kamuela Island. The existing building is old and obsolete. The Nursery operation building is where the majority of tree seedling production activities such as grading and packing seedlings for shipment, washing of trays and containers, mixing of plant media, filling containers with media, bagging seedlings, sowing seed, and storing of nursery equipment and supplies take place.

KAUAI

KALEPA RIDGE WELL #1, CONTROLS, PUMPHOUSE AND PIPELINE, LIHUE WATER SYSTEM

District: Lihue
TMK: 3-8-02: 8
Agency: County of Kauai, Department of Water
Contact: Greg Fujikawa (245-6986)

The existing Kalepa Ridge Well No. 1 and adjacent 0.5 mg concrete storage tank are located on the southern side of Kalepa Ridge at an elevation of 303 feet above mean sea level, overlooking the Hanamaulu residential subdivision. Much of the well and reservoir site is paved with asphalt, and it is enclosed by a chain link fence.

The Department of Water proposes to install a deepwell pump, controls, control building, connecting pipeline, and other facilities needed to reactivate the existing well. Some grading and earthmoving will be required. The pipe connecting the tank to the well is already in place. Power lines for the well and an access road are also in place.

OAHU

BLAISDELL CENTER EXHIBITION HALL EXPANSION AND IMPROVEMENTS

District: Honolulu
TMK: 2-3-8: 001, 002, 003
Agency: City and County of Honolulu, Building Department
Contact: Herbert Muraoka (523-4564)

The proposed project involves the design and construction of planned expansion to the West Concourse structure, Main Exhibition Hall, Ticket Box Offices, Administrative Offices, and upgrade of utilities. New meeting rooms and exhibition space will also be included in the project scope. An additional second floor will be built to free up ground floor space as exhibition space.

KOOLAUPOKO-KANEOHE CORPORATION YARD

District: Koolaupoko
TMK: 4-6-04: por. of 2
Agency: City and County of Honolulu, Building Department
Contact: Herbert Muraoka (523-4564)

The proposed project involves the design and construction of new structures at the existing Yard, and an equipment storage shed on the east of King Intermediate side of the yard. Total space requirements for the proposed improvements are 8,800 square feet.

WAIALAE COUNTRY CLUB LANDSCAPE RENOVATION

District: Honolulu
TMK: 3-5-23: 1
Agency: City and County of Honolulu, Department of Land Utilization
Contact: Dana Kohama (523-4648)
Applicant: Waialae Country Club
Contact: Allan Lum (734-2151)

The applicant proposes to grade the topsoil to form mounds ranging from two to five feet in height on the golf course. Grass will be planted on the mounds when the grading is completed.

The proposed project involves the hauling and placement of approximately 44,800 cubic yards of top soil material that will be graded and mounded in accordance with a Grading Master Plan. The work is to be done in two phases: Phase I will be on the front nine holes and will consist of 9.60 acres and 26,350 cubic yards.

OEQC BULLETIN
May 23, 1992

Phase II will be on the back nine holes and will consist of 6.72 acres and 18,450 cubic yards. The intent of the grading is to provide physical definition and visually aesthetic improvements to what has been a traditionally flat terrain condition. The soil will be placed in the two work phases as indicated on the Grading Master Plan.

WAIKIKI SHELL IMPROVEMENTS

District: Honolulu
TMK: 3-1-43:1
Agency: City and County of Honolulu, Building Department
Contact: Melvin Lee (527-6373)

The City and the County of Honolulu's Building Department is proposing various improvements at the Waikiki Shell complex to enhance the operations of the facility. Improvements include a 1,600 square foot masonry storage building, trash enclosure, repaving the parking area, upgrading the dressing rooms, reroofing the lower roofs, and a new restroom for event service personnel.

EIS PREPARATION NOTICES

The following actions have been determined to have significant impacts upon the environment by the listed Agency (which may be the Accepting Authority). As a consequence, Environmental Impact Statements will be prepared for these projects. A 30-day consultation period commences with the initial publication of these projects in the bulletin (see listed deadline dates). The purpose of soliciting comments during the consultation period is to establish the scope and depth of coverage that the Draft EIS should have.

Please send the original copy of your comments to the accepting authority and duplicate copies of the comments to the proposing agency or applicant, consultant and OEQC.

OAHU

LILIHA CIVIC CENTER

District: Honolulu
TMK: 1-5-7: 1, 14, 15, 18, 57, 58, 60 to 78

Please send your comments to OEQC and the following:

Accepting Authority:
Governor, State of Hawaii
c/o Office of Environmental Quality Control
220 South King Street, 4th Floor
Honolulu, Hawaii 96813
Proposing Agency:
Department of Accounting and General Services
1151 Punchbowl Street, Room 427
Honolulu, Hawaii 96814
Attention: Gina Ichiyama (586-0474)

Consultant:
Wilson Okamoto & Associates, Inc.
1150 South King Street, Suite 800
Honolulu, Hawaii 96814
Attention: Rodney Funakoshi (531-5261)
Deadline: Extended to June 12, 1992

The State of Hawaii Department of Accounting and General Services is proposing to construct the Liliha Civic Center which will allow the consolidation of agencies serving the Downtown-Liliha-Kalihi regional area. The Liliha Civic Center is a State office complex intended to house State agencies and non-profit organizations. The proposed facility will encompass approximately 5.64 acres at the OR&L building site located at the corner of Iwilei Road and North King Street. The new office building development will complement the existing OR&L building, which will be retained on the site. Vehicular access to the site will be provided from Iwilei Road, North King Street, and Kaashi Street off of Dillingham Boulevard.

The proposed project will be completed in two phases. Phase I will consist of approximately 197,000 net square feet of office space and parking for 739 cars. Phase II will consist of approximately 160,000 net square feet of office space and parking for 526 cars.

THE MARICULTURE RESEARCH AND TRAINING CENTER

District: Koolauloa
TMK: 4-9-01: 11, 12, 31, 32 and portions of 13, 14, and 18

Please send your comments to OEQC and the following:

Accepting Authority:
Governor, State of Hawaii
c/o Office of Environmental Quality Control
220 South King Street, 4th Floor
Honolulu, Hawaii 96813
Proposing Agency:
Division of Land and Water Development
P. O. Box 373
Honolulu, Hawaii 96809
Attention: Andrew Monden (587-0260)
Consultant:
Oceanit Laboratories, Inc.
1188 Bishop Street, Suite 2512
Honolulu, Hawaii 96813
Attention: Robert Bourke (531-3017)
Deadline: June 22, 1992

The proposed action will renovate an existing aquaculture facility to create more, but smaller ponds, while establishing support facilities to include an office/classroom/laboratory building, a maintenance facility, a hatchery, and residences for students and caretaker.

The beneficial impacts of the project, as intended by the DLNR Aquaculture Development Program, is to perpetuate a growing and healthy aquaculture industry in the State, and establish Hawaii as a leader in tropical aquaculture research, development and extension. The goals of the MRTC are to advance the aquaculture industry through research, education, extension and training, and aid in the development of new aquaculture technologies and cult

species. The proposed renovation of the existing facility would help facilitate these goals. In addition to use by University graduate and undergraduate educators, the site will also focus on environmental education at the elementary and high school levels and with other public groups, including the mentally and physically challenged.

Renovation of the site would create additional wetlands and improve bird habitats for several endangered species on the site. Appropriate landscaping with native Polynesian plants would enhance the educational aspects of the site. Plans for re-use of freshwater effluent could provide adjacent farmers with water for agriculture plots. Continuation of the current aquaculture use on the site will preserve the "country" nature of the area and open space character of the neighborhood.

Adverse impacts resulting from the renovation project include an increased use of public utilities and infrastructure including water and electricity. Portions of currently unimproved wetland will be converted to aquaculture ponds or channels. In areas where wetland is composed of California Grass, this will result in the loss of bird habitat. The majority of the area planned for expansion will displace existing Hau and/or Mangrove jungle.

Installation of the offshore pipeline, for the seawater system intake, will require dredging of a shallow channel in which the pipeline will be placed, through about 800 feet of mudflat. This action will destroy portions of mudflat communities and will create a limited silt plume during construction. Increased water effluent from the site could adversely impact nearshore waters if the designed wetland does not function properly and if nearshore currents are absent due to low tide and low wind conditions. One likely impact is the seeding of nearshore reef flat areas with algae grown in the effluent channel of the site.

WAIALUA-KUILIMA 46 kV SUBTRANSMISSION LINE

District: Waialua and Koolauloa
TMK: Various

Please send your comments to OEQC and the following:

Accepting Authority:
Department of Land Utilization, City and County of Honolulu
650 South King Street, 7th Floor
Honolulu, Hawaii 96813
Attention: Dana Teramoto (523-4648)

Applicant:
Hawaiian Electric Company, Inc.
820 Ward Avenue
Honolulu, Hawaii 96814
Attention: Ken Morikami (543-7819)

Consultant:
R. M. Towill Corporation
420 Waiakamilo Road, Suite 411
Honolulu, Hawaii 96817-4941
Attention: Chester Koga (842-1133)

Deadline: June 22, 1992

The Hawaiian Electric Company (HECO) is planning a new 46 kV (46,000 volt) subtransmission line from its Waialua substation to its Kuilima substation. The new line will be approximately 12 miles

long. The purpose of the new 46 kV subtransmission line is twofold:

- (1) to maintain reliable electrical service to the North Shore of Oahu by remedying low voltage conditions and providing an alternative subtransmission line that can provide continuous service in the event of a failure of the existing 46 kV line; and
- (2) to provide additional transmission capacity to meet the growing demands of the customers along the North Shore.

Currently, the area between Waialua and Kuilima is being served by a single 46 kV subtransmission line circuit. This area occasionally experiences low voltage conditions which need to be corrected. Additionally, should the existing circuit require repair or maintenance, portions of the system would have to be taken out of service which could result in leaving much, if not the entire North Shore without power while the line is being serviced. The proposed new 46 kV line will give HECO the means for providing continuous uninterrupted service, as well as the added capacity to provide for anticipated future load requirements.

DRAFT ENVIRONMENTAL IMPACT STATEMENTS

A 45-day review period commences with the initial publication of these projects in the bulletin (see listed deadline dates). EIS's listed in this section are available for review at the following repositories:

- Office of Environmental Quality Control
- Legislative Reference Bureau
- Municipal Reference and Records Center (Oahu EISs)
- University of Hawaii Hamilton Library
- Hawaii State Library (Main Branch)
- Kaimuki Regional Library
- Kaneohe Regional Library
- Pearl City Regional Library
- Hilo Regional Library
- Wailuku Regional Library
- Lihue Regional Library
- Branch library in closest proximity to the project

Please send the original copy of your comments to the accepting authority and duplicate copies of the comments to the applicant or proposing agency, consultant and OEQC.

May 23, 1992

KAUAI

UPPER MAKALEHA SPRINGS WATER RESOURCE DEVELOPMENT

DEIS-R

District: Kawaihau
TMK: 4-6-01:01

Please send your comments to OEQC and the following:

Accepting Authority:
Governor, State of Hawaii
c/o Office of Environmental Quality Control
220 South King Street, 4th Floor
Honolulu, Hawaii 968131

Proposing Agency:
Department of Land and Natural Resources, Division of Water and Land Development
P. O. Box 373
Honolulu, Hawaii 96809

Attention: Andrew Monden (587-0260)

Consultant:
Portugal and Associates, Inc.
4444 Rice Street, Suite 109
Lihue, Hawaii 96766
Attention: James Pedersen, Volcano, HI (967-7619)
Deadline: July 7, 1992

The Revised Draft EIS for the Upper Makaleha Springs Water Resource Development has been submitted and the description is as follows:

The Hawaii Division of Water and Land Development proposes to tap natural springs on State Land in the Makaleha Mountains of East Kauai, and to pipe the water to Kapaa for domestic uses. The project involves the construction of a concrete intake basin and approximately 4,000 feet of iron pipe. The proposed project will fulfill the primary purpose of the Kealia Forest Reserve which is to serve as a source of water supply.

Other project alternatives considered included the no project option, drilling a new well on Akulikuli Ridge, enlarging existing water tunnels, and the construction of a surface impoundment, and water conservation within the Wailua-Kapaa system.

The proposed project will help alleviate existing water shortages in the Kapaa-Wailua area by increasing the water supply capacity to approximately 18 percent. Adverse environmental impacts include a degradation of native fish and shrimp habitats and surface water quality, especially during construction. In addition, the project also will include the diversion of about 1.0 mgd of surface water presently allocated to the Lihue Plantation Company (LPC) for irrigation purposes. These impacts will be mitigated by: 1) the use of cement rubble masonry for the intake and pipeline pedestal construction; 2) limitation of vegetation removal and replanting of exposed riparian areas with indigenous vegetation; 3) the limitation of construction work within a defined construction easement on the north side of Makaleha Stream; 4) the use of silt fences and fabric material to reduce potential sedimentation; 5) the scheduling of excavation work during the drier months of May through September; 6) a commitment by Kauai County to not capture water from the springs if LPC irrigation requirements are unmet;

7) periodic monitoring of the aquatic habitat of Upper Makaleha Stream by the Kauai district office of the State Division of Aquatic Resources; 8) the reduction of water capture by the Kauai County Department of Water if state monitoring detects significant adverse impacts upon aquatic habitat due to increased dewatering; and 9) a successful negotiation between the State of Hawaii and the LPC that results in a reduced diversion requirement for the irrigation water in Kealia.

The project is consistent with the Kauai County General Plan and the Hawaii State Plan.

FINAL ENVIRONMENTAL IMPACT STATEMENTS

The following EISs have been submitted for acceptance. All substantive comments received by the applicant or proposing agency, and corresponding responses, should be contained within the Final EIS. Those who wish to contest the acceptance of an EIS have a 60-day period in which to initiate litigation. The 60-day litigation period starts from the date of publication of the notice of acceptance in the OEQC Bulletin.

FEIS - RW **KAUAI**

UPPER MAKALEHA SPRINGS WATER RESOURCE DEVELOPMENT

District: Kawaihau
TMK: 4-6-01:01

Accepting Authority: Governor, State of Hawaii
Proposing Agency: Department of Land and Natural Resources, Division of Water and Land Development

Status: The Department of Land and Natural Resources has withdrawn the revised Final EIS submitted February 13, 1991, and replaced it with the Revised Draft EIS dated April 1992. Please see the Draft EIS Section.

MAUI

PROPOSED NEW KIHEI ELEMENTARY SCHOOL SITE SELECTION REPORT AND FINAL ENVIRONMENTAL IMPACT STATEMENT

District: Makawao
TMK: 3-9-19: 4; 3-9-19: 6; 2-1-8: 42; 3-9-4: 129, 75, 76

Accepting Authority: Governor, State of Hawaii
Proposing Agency: Department of Accounting and General Services

Status: Currently being reviewed by the Office of Environmental Quality Control

The Department of Accounting and General Services is proposing to construct a new elementary school with a design enrollment of 900 students in the South Kihei area on Maui. The new school is required to relieve the over-capacity enrollment of the only existing school in the area.

elementary school in the school service area, Kihei Elementary School, and to provide adequate facilities for the increasing population growth in the service area (Maalea, Kihei, Kamaole, Wailea, and Makena). The estimated first increment (18 classrooms, temporary dining room and library, land acquisition) project cost is \$18,684,000.

Based on criteria established by the Department of Education, four sites were identified and evaluated in the Site Selection Report: Site 1 is located along Kananui Road; Site 2 is located along Kananui Road immediately adjacent to Site 1 on its north side; Site 3 is located off Kapili Street just south of Kilohana Drive between Kapili Street and Wailea Ala Nui Drive; Site 4 is located off Kilohana Drive on the north side between Kauhale and Kihei Road. Three of the candidate sites are located in residential districts which allow school uses by right and one site (Site 3) is zoned "public use" for a school.

The proposed elementary school, when completed, will include approximately 47 classrooms (39 permanent, 8 portable) as well as a cafeteria, library, play areas, parking and landscaping. It will occupy about 8 acres.

OAHU

FEISS

EWA MARINA PHASE I
INCREMENT 2, SUPPLEMENTAL FINAL ENVIRONMENTAL
IMPACT STATEMENT AND ADDENDUM REPORT

District: Ewa
TMK: 9-1-11:1 through 7; 9-1-12:2, 3, 5 por. 7 por. 8 through 17, 12 por.
Accepting Authority: City and County of Honolulu, Department of General Planning
Applicant: Haseko (Ewa), Inc.
Status: Accepted by the Department of General Planning on May 8, 1992.

The applicant proposes to reconfigure land uses depicted on the Ewa Development Plan (DP) Land Use Map. The request to reconfigure land uses in the 535 acre Phase I, Increment 2 results from a modification of the marina configuration based on environmental considerations identified through on-going processing of a Department of Army permit application. The reconfiguration is also based upon a refinement of the development concept for the Ewa Marina Community. Specifically, the marina has been reconfigured to avoid important archaeological remains, minimize impact on the caprock aquifer, avoid adverse impacts on surf sites, and improve water circulation. Refinement of the development concept of the Ewa Marina community preserves its overall character, including the number of residential units (approximately 3,560 units in Phase I, Increment 2) previously assessed in the Final EIS and addenda which were accepted in 1986 by the Department of Land Utilization. The proposal would redistribute land uses depicted on the DP Land Use Map without introducing any new land uses. Principal components proposed include the marina, a marine/commercial component, a residential component and a circulation system for vehicles and pedestrians.

KAILUA GATEWAY DEVELOPMENT

District: Koolauapoko
TMK: 4-2-1: por. 1 and por. 55; 4-2-3: por. 17 and por. 29
Accepting Authority: City and County of Honolulu, Department of General Planning
Applicant: Kaneohe Ranch
Status: Accepted by the Department of General Planning on May 15, 1992.

Kaneohe Ranch has applied to the City and County of Honolulu Department of General Planning for an amendment to the Koolauapoko Development Plan (DP) Land Use Map to permit the development of a lifecare retirement community, elderly affordable housing, community center, and the expansion of an existing commercial area in Kailua, Koolauapoko, Oahu. The application requested the redesignation of approximately 32 acres of land from Preservation to Medium Density Apartment and 1 acre from Preservation to Commercial.

The area of application is part of a total 97-acre project area located in the vicinity of the intersection of Kailua Road and Hamakua Drive. The project area is bounded by Kailua Road, Kaelapulu Stream, Enchanted Lake subdivision and the Puu O Ehu ridge. Hamakua Drive bisects the property into an 89-acre mauka portion and 8-acre makai portion. The remaining 64 acres of the project area not included in the area of application will remain in the Preservation district.

The retirement community will include 333 independent living units, 20 personal care units, and a 60-bed skilled nursing center. This facility will be located on the mauka portion of the property which may accommodate social services, child care, adult day care, worship services, and community meeting space. The existing commercial area along Kailua Road is proposed to be expanded by about one acre. About 70 units of affordable elderly housing are planned for the makai portion of the property. The project area includes 27 acres of wetlands located on both sides of Hamakua Drive, which are intended to be enhanced, protected and dedicated to the State under separate actions. These wetlands are not included in the DP amendment area.

LA'IE DEVELOPMENT PLAN AMENDMENTS

District: Koolauloa
TMK: 5-5-02: 10, 11, 20; 5-5-04: por. 3, por. 7; 5-5-05: por. 18, 20, por. 21, por. 23; 5-5-06: por. 1, por. 5, por. 10, por. 30, 32, 33; 5-5-07: por. 1; 5-5-08: por. 1; 5-5-09: 12; 5-5-14: 7, por. 24; 5-5-17: 5,6.
Accepting Authority: Department of General Planning, City and County of Honolulu
Applicant: Zions Securities Corporation
Status: Accepted by the Department of General Planning on May 15, 1992.

Zions Securities Corporation (on behalf of the landowner, Property Reserve, Inc.) proposes to amend the City and County of Honolulu Koolauloa DP Land Use Map to redesignate a total of 201 acres as follows:

Agricultural to Residential: 55 acres
Agricultural to Low Density Apartment: 8 acres
Residential to Commercial: ±0.5 acres
Agricultural to Public Facility: ±106 acres
Residential to Resort: 2.6 acres
Residential to Parks and Recreation: 3.6 acres
Agricultural to Commercial: ±21 acres
AG/PF to Industrial: ±4 acres
Industrial (reconfiguration): ±3 acres

These amendments are the first step toward implementation of a long-term Master Plan for Laie. The redesignations are proposed to provide new affordable residential and employment opportunities for Laie residents; to reserve appropriate areas for long-term expansion of the BYU Hawaii campus and the Polynesian Cultural Center; to provide a limited amount of light industrial area for local small businesses and service establishments; to increase the viability of a future hotel on already zoned land in Laie through the provisions of an ocean front amenities area; to provide additional parking at the Laie Shopping Center; to correct the designations of areas currently used for a park and a sewage treatment plant.

NEPA DOCUMENTS

CLOSURE OF THE CENTRAL PACIFIC LORAN STATION CHAIN (Finding of No Significant Impact/Notice of Availability)

Location: Kure Atoll, Johnston Atoll, Upolu Point (Big Island),
Coast Guard Loran Stations
Agency: U. S. Coast Guard, Civil Engineering Unit Honolulu
300 Ala Moana Boulevard
Honolulu, Hawaii 96850
Contact: Elizabeth Muller (541-3607)

The U.S. Coast Guard proposes to terminate the operation of its Central Pacific (CENPAC) Long Range Navigation (LORAN) Stations on Kure Atoll, Johnston Atoll, and Upolu Point, Island of Hawaii. This environment assessment examines the impacts of physically closing down (demolishing) the stations's structures, the relocation of operating personnel, the removal of equipment and materials, the burial of other materials, and sealing up of some buildings.

The Coast Guard has determined that the CENPAC chain has very few users, and these users can now utilize the satellite-based Global Positioning System for equal or superior service. Closing this LORAN chain would save the Coast Guard \$2.5 million per year.

The closure schedule for these stations is proposed as: December 1992 to mid-January 1993 for Johnston Atoll; 15 June to 31 July 1992, and 1 July to 1 October 1993 for Kure Atoll; and 30 June 1992 to 1 March 1993 for Upolu Point. The schedule for Kure and Johnston, which support several sensitive species of seabirds and seals, was chosen to coincide with those times of the year when these species are present in fewest numbers.

The following is a correction to the Environmental Assessment on the Closure of the Central Pacific (CENPAC) LORAN Station Chain.

The Environmental Assessment states on page B-1 that "hazardous and non-hazardous materials from the landfill and scrap metal dump would be sorted, packaged accordingly, and transported off-island."

This should read that "hazardous and non-hazardous materials from the landfill and scrap metal dump would be sorted. All hazardous material and scrap metal that poses a threat of entrapment to the wildlife on Kure would be packaged accordingly and transported off-island. All non-hazardous material and scrap metal that does not pose an entrapment threat to the wildlife would be transported inland to a site designated by the Department of Land and Natural Resources for burial."

KAUAI

STRATEGIC TARGET SYSTEM (Final Environmental Impact Statement/Notice of Availability)

Agency:
U.S. Army Strategic Defense Command- Huntsville
P. O. Box 1500
Huntsville, Alabama 35807-3801
Contact: D. R. Gallien (205-955-3294)

The proposed action is to launch Strategic Target System vehicles from the Kauai Test Facility (KTF) on the island of Kauai and to establish land use controls over certain lands and waters adjacent to the launch site. Up to four vehicles would be launched each year in order to test non-nuclear elements of the Strategic Defense Initiative.

The EIS consists of the Draft EIS issued in February 1992 for agency and public review and the Final EIS, which responds agency and public comments. The Final EIS is in three volumes. The first volume contains additions and revisions to the Draft EIS and responses to agency and public comments. For convenience, it also includes the executive summary from the Draft EIS as an appendix. The second and third volumes contain the transcript of the public hearing on the Draft EIS and exhibits and comment letters submitted by government agencies and the public.

Those who received copies of the Draft EIS will receive a copy of the Final EIS. A copy of the Final EIS may also be requested by calling 1-800-377-8552.

The Strategic Defense Initiative Organization intends to issue a Record of Decision (ROD) at least 30 days after the Notice of Availability for the Final EIS is published in the Federal Register. The ROD will describe the decision and will identify the alternatives that were considered, the alternative selected, and the alternative that was considered to be environmentally preferable. The ROD will identify and discuss all relevant factors in making the decision, including economic and technical considerations, agency mission, and considerations of national policy that were balanced in making the decision. The ROD will also indicate any mitigation measures that will be implemented to reduce environmental impacts, if required.

The point of contact is Mr. D. R. Gallien, Attention: CSSD-EN-V, Post Office Box 1500, Huntsville, Alabama 35807-3801, Phone: (205) 955-3294.

OTHER DOCUMENTS

The following documents are not required under Chapter 343, Hawaii Revised Statutes. They have been prepared to facilitate the planning and permitting process and to provide an opportunity for the public to participate in reviewing and commenting on the proposed project.

OAHU

LA'IE WASTEWATER RECLAMATION FACILITY (Notice of Preparation of EIS)

District: Koolauloa
TMK: 5-5-06: Portion 5, 33 and 11

Please send your comments to OEQC and the following:

Accepting Agency:
Department of Health, Wastewater Branch
500 Ala Moana Boulevard
Five Waterfront Plaza, Suite 250
Honolulu, Hawaii 96813

Applicant:
Zions Securities Corporation
55-510 Kamehameha Highway
Laie, Hawaii 96762
Attention: Lucky Fonoimoana (293-9201)

Consultant:
Group 70 International, Inc.
924 Bethel Street
Honolulu, Hawaii 96813
Attention: Jeffrey Overton (523-5866)
Deadline: June 22, 1992

Zions Securities Corporation is proposing the La'ie Wastewater Reclamation Facility (LWRF) to upgrade and expand the existing La'ie Wastewater Treatment Plant. The existing treatment plant is an extended aeration facility designed to treat approximately 0.445 million gallons per day (mgd) to a secondary level of treatment. The existing wastewater system serves the Hawaii Temple, Brigham Young University - Hawai'i campus, Polynesian Culture Center, Laie Shopping Center and portions of the La'ie residential area.

The proposed LWRF includes modification of the existing facilities to an oxidation channel system providing a tertiary level of treatment with a total capacity of 1.5 mgd. The proposed LWRF will accommodate the planned expansion of residential and commercial development and institutional facilities in La'ie over the next 10 to 20 years.

Short-term disposal of treated effluent is planned to utilize a subsurface drain field located approximately 4,000 feet southeast of the existing treatment plant. The proposed long-term disposal method is via water reclamation for agricultural land irrigation purposes. Sludge material will be composed with landscaping waste to produce a soil amendment.

The proposed La'ie Wastewater Reclamation Facility does not trigger preparation of an EIS pursuant to Chapter 343, Hawai'i Revised Statutes (HRS); however, the DOH and Zions Securities Corporation have agreed to prepare an EIS as part of the planning and permitting process. The EIS process will allow the potential environmental effects of the proposed project to be fully addressed and disclosed to agencies and interested organizations. The standard procedures and timetables will be followed for the preparation and review of the environmental documents for the LWRF project, even though the documents are not being prepared pursuant to Chapter 343, HRS. The EA will allow for the general public and governmental agencies to review a generalized environmental assessment of the project and provide comments towards the content of the Draft EIS.

NOTICES

ENVIRONMENTAL ASSESSMENT CONTENTS AND NOTICES OF DETERMINATION

This information is intended to provide guidance to the public regarding the environmental review process; specifically for the preparation of environmental assessments. The reader is referred to Chapters 341 and 343 of the Hawaii Revised Statutes and Chapter 200 of Title 11, Department of Health Administrative Rules, prior to any document preparation. (References in brackets refer to either Hawaii Revised Statutes, Chapter 343, or Title 11, Chapter 200, Department of Health Administrative Rules.)

The purpose of preparing an environmental assessment is to determine if the impacts of a proposed action are significant enough to warrant the preparation of an Environmental Impact Statement [§11-200-2].

An Environmental Assessment is a document which is prepared for a proposed action which triggers the Environmental Impact Statement Process. Briefly summarized, the eight triggers that require the preparation of an environmental assessment [§343-5] are:

- (1) Use of State or County lands or funds
- (2) Use within Conservation District Lands
- (3) Use within the Shoreline Setback Area
- (4) Use within any Historic Site or District
- (5) Use within the Waikiki Special District
- (6) Amendments to a County General Plan (except for those initiated by the County)
- (7) Reclassification of Conservation Lands
- (8) Construction or modification of helicopter facilities

During the preparation of an environmental assessment, the procedures listed in §11-200-9, Early Assessment, must be followed. Historically, one of the steps frequently overlooked has been §11-200-9 (a)(4). This section requires consultation with agencies having jurisdiction or expertise as well as consultation with citizen groups and individuals.

The proposed action must be described in its entirety; therefore, projects should not be done on an incremental basis to avoid the preparation of an environmental impact statement [§343-6(a)(2), §11-200-7].

Environmental assessments must include (but are not limited to) the following [§11-200-10]:

- (1) Identification of applicant or proposing agency;
- (2) Identification of approving agency, if applicable;
- (3) Identification of agencies consulted in making assessment; (Failure to identify consulted agencies will result in the delayed publication of the submitted environmental assessment in the OEQC Bulletin.)
- (4) General description of the action's technical, economic, social, and environmental characteristics; (Some GENERAL guides to the content of each characteristic are listed below:

This section should generally answer the "What, Why, Where, When, Who and How" of the proposed action and its short and long-term impacts.

Technical

Describe the purpose of the project and in general terms how the project will be accomplished. If applicable, the dimensions of the project should be included.

Socio-Economic

Describe the economic impacts on the immediate community as well as on the community at large. The assessment may include, but not be limited to, providing income for the county/state and creating employment opportunities in areas with high unemployment rates.

Describe issues pertinent to the specific project. If an action involves a targeted segment of the population, any/all positive or negative effects must be discussed. In addition, any other issues pertinent to the action (such as: population density, recreational facilities, child care provisions, relocation of residences, etc.) must be discussed.

The Socio-Economic Impact does not apply to the impact of the action on the proposing agency or applicant. For state or county projects, the cost of the proposed action should be included in the assessment.

Environmental Characteristics

Describe, as applicable, aesthetics, the generation of air pollution, traffic congestion, noise levels, effects on water quality or any other aspect of the environment which may be affected by the proposed action.

- (5) Summary description of the affected environment, including suitable and adequate location and site maps;

Include flora, fauna, significant habitats, historical/archeological and cultural sites. Describe adjacent natural resources. Sensitive habitats (such as a refuge) or bodies of water (stream, river, ocean, estuary, anchialine pond) adjacent to a proposed project must be addressed.

- (6) Identification and summary of major impacts and alternatives considered, if any; identify positive as well as negative major impacts. The impacts of concern are of the proposed action on the surrounding environment and community, not the impact of the environment on the action. The alternatives considered should be included when applicable.

- (7) Proposed mitigation measures, if any: It is not sufficient to write one sentence stating that appropriate mitigation measures shall be instituted wherever necessary. The potential problems must be identified and appropriate mitigation described in general terms. Best Management Practices should be cited whenever possible. For mitigation at Historic Sites, the environmental assessment must include: 1) copies of the Mitigation and/or Preservation Plans prepared for the Department of Land and Natural Resources' State Historic Preservation Program; and 2) a copy of the approval letter for the plans from the State Historic Preservation Program.

- (8) Determination;

The agency shall consider every phase of a proposed action, the expected consequences, both primary and secondary, and the cumulative as well as the short and long-term effects of the action in making a determination.

A determination letter from the Approving Agency must be submitted with the environmental assessment identifying it as either a Negative Declaration or Environmental Impact Statement Preparation Notice. This letter is a formal declaration stating that the document has been reviewed and the action will or will not have significant impacts on environment. This must be the Approving Agency determination, not the consultant's determination.

- (9) Findings and reasons supporting the determination; Evidence justifying the statement that the proposed action will or will not result in any significant environmental impact, must be included, and
- (10) Agencies to be consulted in the preparation of the environmental impact statement, if applicable. This is necessary only for assessments which are determined to require environmental impact statements.

An environmental assessment is submitted to an Approving Agency which determines if the proposed action will have a significant impact [§11-200-11(a), §11-200-12]. If the agency's review determines that the proposed action will not have a significant impact, a Negative Declaration is issued. If the agency determines the action will have a significant impact, an Environmental Impact Statement Preparation Notice is issued.

The Notice of Determination (Negative Declaration or EIS Preparation Notice) which is issued by the Approving Agency must include [§11-200-11(c)]:

- (1) Identification of applicant or proposing agency
- (2) Identification of accepting authority
- (3) Brief description of proposed action
- (4) Determination

- (5) Reasons supporting the determination
Name, address and phone number of contact person for further information

Both Negative Declarations and EIS Preparation Notices must be submitted by the Approving Agency to OEQC for publication in the OEQC Bulletin [§11-200-11(b)]. OEQC has a "Document for Publication Form" which should be filled out and submitted to OEQC with the Negative Declaration or Environmental Impact Statement Preparation Notice.

NEGATIVE DECLARATIONS ARE NOT "ACCEPTED." Once a determination has been made, the document stands as a Negative Declaration unless it is legally challenged. There is a 60 day "Statute of Limitations" [§343-7(b)] during which the public or other agencies may challenge the determination of "negative declaration." A Negative Declaration is not considered "accepted" as with Final EIS's, therefore, it is not republished in the OEQC Bulletin. If you have any questions or need further information on the Environmental Review Process, please call the Office of Environmental Quality Control at 586-4185.

**PRE-ASSESSMENT CONSULTATION
LIST FOR ENVIRONMENTAL
ASSESSMENTS**

During the preparation of an environmental assessment, the procedures listed in Hawaii Administrative Rules, §11-200-9, Early Assessment, must be followed. Historically, one of the steps frequently overlooked has been §11-200-9(a). This section requires consultation with agencies having jurisdiction or expertise as well as consultation with citizen groups and individuals. This consultation process is especially important for environmental assessments which result in Negative Declaration because it provides the public with a comment period before a determination is made.

The appropriate agencies and groups from the list below should be consulted before the preparation of an environmental assessment. This list is not meant to be comprehensive. Each proposed action is unique in itself and may require consultation with other agencies and concerned groups.

PUBLIC NOTICE

MEETING 92-05 OF THE STATE ENVIRONMENTAL COUNCIL

Wednesday, May 27, 1992, at 4:00 p. m.
Office of Environmental Quality Control Library
Central Pacific Bank Plaza
220 South King Street, Fourth Floor
Honolulu, Hawaii 96813
Telephone (808) 586-4185

AGENDA

1. Call to Order.
2. Review and Approval of the April 22, 1992, Draft Meeting Minutes.
3. Subcommittee on the Hawaii Environmental Risk Ranking Project: Discussion.
4. Committee on the Annual Report.
 - A. Report on Draft 1991 Annual Report of the Environmental Council.
 - B. Discussion and Decision on Committee Recommendations.
 - C. Discussion and Decision on Identification of Issues of Ongoing Concern.
 - D. Discussion and Decision on Approval, Printing, Notice of Availability and Distribution of the FY 1991 Annual Report.
 - E. Agencies to be invited to Future Council Meetings to Monitor Progress and Discuss Significant Fiscal Year 1992 Environmental Issues for Preparation of the FY 1992 Annual Report.
 - F. Decision and Schedule for Inviting Agencies Identified in Item 4-E *supra* to Future Environmental Council Meetings.
5. Committee on Administrative Rules.
 - A. Report on Working Draft 1 of Chapter 200, Title 11, Hawaii Administrative Rules (Environmental Impact Statement Rules).
 - B. Report on Working Draft 1 of Chapter 201, Title 11, Hawaii Administrative Rules (Environmental Council Rules of Practice and Procedure).
 - C. Current Pending Legislative Measures (HB 3946, HB 2391) and Their Effect on Chapter 200 and Chapter 201, Title 11, Hawaii Administrative Rules.
6. Committee on the Annual Agenda
 - A. Long Range Goals and Objectives for the Environmental Council.
 - B. Planning of Specific Tasks to Accomplish Long Range Goals and Objectives identified in Item 6-A *supra*.
7. Correspondence and Other Unfinished Business
 - A. Correspondence Received and Sent.
 - B. Other Unfinished Business.
8. New Business
 - A. New Business Items Raised by Members and Decision on Appropriate Action for Each Item Raised.
 - B. Discussion and Decision on the Agenda for the Next Meeting of the Environmental Council.
9. Adjournment.

OEQC BULLETIN
May 23, 1992

**NOTICE OF AVAILABILITY: ANNUAL REPORTS OF THE
ENVIRONMENTAL COUNCIL FOR FISCAL YEAR 1989 AND
1990**

The Chairperson of the Environmental Council announces the availability of the following documents to the general public:

1. *Hawaii's Environment: Annual Report of the Environmental Council for Fiscal Year 1989; and,*
2. *1990 Annual Report of the Environmental Council.*

Those persons wishing to receive one copy of the above reports should submit written requests to:

Mrs. Sue Hee
Office of Environmental Quality Control
220 South King Street, Fourth Floor
Honolulu, Hawaii 96813

Telephone requests may also be made to Mrs. Hee at 586-4185.
